PROFESSIONAL SUMMARY

B.E. graduate (2026) seeking an entry-level AI/ML Engineering role. Experienced in building end-to-end AI applications. Passionate about AI Agents and solving complex, real-world AI problems. Eager to apply technical knowledge and self-driven project experience to contribute to impactful projects.

EDUCATION

Bachelor of Engineering – Electrical and Electronics Engineering 2022 – 2026
Rajalakshmi Engineering College
CGPA : 7.06

Higher Secondary Certificate (HSC) 2021 – 2022
St. Joseph Anglo Indian Boys Higher Secondary School

TECHNICAL SKILLS

Programming Languages

Python, SQL

AI & LLM Tools

Gemini API, LangChain, RAG, FAISS, ChromaDB

Libraries & Frameworks

Streamlit, Flask, Pandas, NumPy, Scikit-learn

Developer Tools

Git, GitHub, Jupyter Notebook, SQLite

PROJECTS

Enterprise AI Knowledge Assistant using RAG

Python, LangChain, FAISS, Streamlit

- Implemented a Hybrid RAG-based Enterprise AI Knowledge Assistant that retrieved and re-ranked the top 3 most relevant document chunks using FAISS, BM25, and Cross-Encoder. Integrated Gemini 2.5 Flash, query rewriting, and multi-turn conversation support to deliver accurate, context-aware responses while reducing LLM hallucinations.

AI Interview Management System

Python, Streamlit, Google Gemini API, SQLite, Speech-to-Text

- Engineered an AI-powered Interview Management System that analyzes resumes to identify candidate skills, projects, certifications, and target roles using the Gemini API. Implemented adaptive interview generation, AI-based answer evaluation, contextual follow-up questions, voice-enabled interview support, automated performance scoring, and comprehensive interview report generation using Python, Streamlit, and SQLite.

Smart Fruit Detector

ESP32, ESP32-CAM, Python, Machine Learning, TCS3200, Gas Sensor, Load Sensor

- Designed a machine learning-based Smart Fruit Detector that achieved 85% classification accuracy across 7 fruit types by fusing image, color, gas, and weight data for freshness classification and shelf-life prediction. Integrated ESP32-CAM, TCS3200 Color Sensor, Gas Sensor, and Load Sensor to enable real-time fruit quality monitoring.

COURSES

100 AI Agents in 100 days

Udemy

Learned AI agent development using LangChain, RAG, LLM integration, vector databases, prompt engineering, and agent orchestration.
